

## *Where Technology and Performance Meet*

Glass Fusion International's mission is to provide products and services that will help you effectively save more time and money on your hard surface needs. Our unique and innovative proprietary systems protect a variety of surfaces. GFI is the exclusive manufacturer of Glass Fusion™ Sealers and Shark Fusion® Anti-Slip Sealers.

Our technicians are trained through a series of courses that ensure the product is applied correctly to yield the highest performance. As important as our process and the product, we continue to educate and provide our customers with technical support after the service for any maintenance needs.

GFI is taking on the tough eco challenges of today's business. By devoting innovative thinking and integrating cutting edge trends, our products are environmentally safe.

## *Solutions for your Slippery Surfaces*

NO MORE

SLIPPERY  
WHEN WET

According to the United States Department of Labor’s Bureau of Labor Statistics, more than 602,000 workers were injured by slips and falls. Keeping floors dry is a factor in preventing these injuries. Our unique process creates a high coefficient of friction to ensure stability.

**PREVENTION**

Keeping floors dry is a factor in preventing slip and fall injuries. Unfortunately some areas like pool deck, kitchens, and bathrooms are some of the most difficult areas to constantly keep dry. Our unique process creates a high coefficient of friction to ensure stability. Shark Fusion® provides a durable long lasting safe floor without changing the look of your surface. Our Anti-Slip System reduces the risks and dangers of slips and falls on ceramic tiles, marble, polished stones, terrazzo, polished concrete, painted or stained concrete.

**ANTI-SLIP PRODUCTS**

- SFTG2100 Tile & Grout
- SFNS2110 Natural Stones
- SFCC2120 Raw/Decorative Concrete

*Below are test results using ASTM F1679 English XL Variable Incident Tribometer (VIT) on polished granite.*

Product	Average Dry (COF)	Average Wet (Slip-Resistance Index)
Untreated Panel	>0.31	>0.24
Treated Panel (Shark Fusion)	>0.70	>0.79

Polished granite, the most slipperiest surface when wet.

**PROTECTION**

The Shark Fusion® line of anti-slip products is an unique proprietary product unlike other competitive treatments or sealers on the market. There are no additives or sand particles in our products. Be aware that any harsh chemicals such as acid used to etch your floor will destroy the integrity of the surface and strip the pigmentation. Shark Fusion® Anti-Slip System is clear and will not change the look of your surface. When wet, you will feel the added traction when walking over the sealed surface.

**BENEFITS**

- Reduces Slip/Fall Injuries
- Reduces Bacteria Breeding
- Reduces Mold Growth
- Stops Permanent Staining
- Doesn't Alter the Appearance
- Moisture Barrier
- 100% UV Stable
- Easy to Clean & Maintain

**PRESERVATION**

Preserve the life and durability of your surface, whether it's natural stone or decorative/stained concrete. Sealing with any of the Shark Fusion® products will protect the surface from food stains or environmental pollutants that will cause discoloration and deterioration over time. Once sealed, maintenance is easy and slip and falls are reduced.

**APPLICATIONS**

- All Natural Stones
- Ceramic Tile
- Terrazzo
- Polished Concrete
- Painted/Stained Concrete
- Mosaic Surfaces
