

AG100 Graffiti Sealer

A non-sacrificial coating that eliminates repainting. Prevents magic markers, spray paints, crayon and ink from permanently staining the surface. Cleaning is as easy as 1-2-3. Spray and wipe with alcohol.

Easy to Clean and Maintain

1. Spray with Alcohol
2. Wipe with Sponge
3. Graffiti is gone

Where Technology and Performance Meet

GFI is the exclusive manufacturer, marketer, supplier and installer of the Glass Fusion™ products. We recommend sealing the surface after the construction phase so that we maintain an excellent long-term aesthetics.

We are continually researching and integrating cutting edge trends and technology to pioneer a new generation of sealers.

solutions that protect your surfaces, prolonging the life and preserves the beauty of your environment

TG100 Tile & Grout

Rejuvenates the color of worn discolored tiles. Locks out the accumulation of dirt, oils and musty urine odors in the grout joints. Keeps dirt from pooling onto textured tiles.

BR100 Brick & Pavers

Provides a durable barrier from efflorescence migrating through the substrate. Prevents pollution causing stains as well as mold and mildew growth in high moisture areas.

CC100 Concrete

A durable long term weather proof barrier while retaining all vapor permeability. It is unaffected by oil, grease, pollutants, mold and mildew growth in high moisture areas.

PS100 Painted/Stained Concrete

Adds unsurpassed durability to painted or stained surfaces that are susceptible to color fade or degradation from environmental elements such as oil, grease, mold and mildew.

GF100 Grout

Provides resistance to spills, stains in the grout joints and locks out the accumulation of dirt, oils and musty urine odors. Alternative to sealing your grout joints without changing the look of your tile.

NS100 Natural Stones

Enhances the natural colors and withstands airborne pollutants that cause staining and discoloration. The deepening and gloss of the stone depends on the porosity of the surface.
